*Nota de Práctica<sup>1</sup> para la Norma Internacional de Auditoría (NIA) 550*

---

## Partes vinculadas

### Fundamentos

Esta Nota de Práctica proporciona orientaciones adicionales sobre la NIA 550, “Partes vinculadas” y debe leerse conjuntamente con ella. La NIA 550 entra en vigor para las auditorías de estados financieros correspondientes a los períodos que comiencen a partir del 15 de diciembre de 2009. Esta Nota de Práctica será efectiva en la misma fecha que la NIA.

### Introducción a la NIA

La NIA 550 establece las obligaciones del auditor con respecto a las relaciones y operaciones mantenidas con partes vinculadas y en concreto detalla la aplicación de la NIA 315, la NIA 330, y la NIA 240 en lo relativo a los riesgos de incorrecciones materiales en las relaciones y operaciones mantenidas con partes vinculadas.<sup>2</sup>

### Contenido de la Nota de Práctica

- P1. La Nota de Práctica proporciona orientaciones adicionales para los auditores del sector público en relación con los aspectos siguientes:
- a) Consideraciones generales.
  - b) Definiciones.
  - c) Procedimientos de evaluación de riesgos y actividades conexas.
  - d) Identificación y evaluación de riesgos de incorrecciones materiales debidas a las relaciones y operaciones mantenidas con partes vinculadas.
  - e) Respuestas a los riesgos de incorrecciones materiales debidas a las relaciones y operaciones mantenidas con partes vinculadas.

### Aplicabilidad de la NIA en la auditoría del sector público

- P2. La NIA 550 es aplicable a los auditores de las entidades del sector público en el desempeño de su función de auditores de los estados financieros.

---

<sup>1</sup> Todas las Notas de Práctica habrán de leerse conjuntamente con la ISSAI 1000 Introducción general a las directrices de auditoría financiera de la INTOSAI.

<sup>2</sup> NIA 315, “Identificación y evaluación de los riesgos de incorrecciones materiales mediante la comprensión de la entidad y su entorno”. NIA 330, “Respuesta del auditor ante los riesgos evaluados.” y NIA 240, “Obligaciones del auditor en relación con el fraude en una auditoría de estados financieros.”

## Orientaciones adicionales sobre cuestiones ligadas al sector público

- P3. La NIA 550 contiene disposiciones de aplicación y otras disposiciones explicativas con consideraciones específicas a las entidades del sector público en el párrafo A8.

### Consideraciones generales

- P4. Las entidades del sector público pueden estar sometidas además a restricciones específicas del alcance y la naturaleza de las operaciones que pueden mantener con partes vinculadas, restricciones consistentes en la prohibición de operaciones y prácticas que serían admisibles en las relaciones con partes vinculadas al margen del sector público.

### Definiciones

- P5. El subpárrafo 10 b) de la NIA contiene una definición de parte vinculada, en la que el marco de información financiera aplicable establece o no exigencias mínimas en relación con ellas, incluidas las entidades sujetas a un control común. Los auditores del sector público tendrán presente que, según esta definición, no se consideran vinculadas las entidades sujetas al control común del Estado (es decir, las administraciones nacionales, regionales o locales) a menos que efectúen operaciones significativas o compartan recursos en medida considerable.
- P6. Los auditores del sector público examinarán si el hecho de excluir entidades sujetas al control común del Estado de la definición de partes vinculadas implica mayores riesgos al auditar las entidades del sector público. Por ejemplo, puede darse una situación en que un ministro controle una serie de entidades que no compartan recursos considerables ni efectúen operaciones significativas, pero en la que haya gran número de operaciones aparentemente insignificantes que tengan carácter irregular. Asimismo puede haber situaciones en las que no se registren operaciones, cuando por ejemplo el ministro influye en una entidad para que no pague dividendos a otra entidad con la finalidad de incidir en el flujo de tesorería y las decisiones de asignación presupuestaria consiguientes.
- P7. Los auditores del sector público tendrán presente esta definición más amplia de parte vinculada cuando apliquen la NIA.

### Procedimientos de evaluación de riesgos y actividades conexas

- P8. Para conocer las relaciones y operaciones mantenidas por la entidad del sector público con partes vinculadas, además de los procedimientos descritos en los párrafos 11 a 14 de la NIA, los auditores del sector público atenderán a los aspectos siguientes:
- La naturaleza jurídica y las exigencias reglamentarias de la entidad y sus partes vinculadas, es decir, si la entidad es un ministerio, un departamento administrativo, un organismo o cualquier otra modalidad de entidad pública.
  - La comprensión de las operaciones comerciales de entidades del sector público, adquirida en muchos casos mediante el conocimiento de los distintos tipos de actividades gubernamentales, entre las que figuran los correspondientes programas y las principales entidades contratadas para llevarlos a cabo.

- El sistema para controlar la entidad, admitiendo la probabilidad de que en el sector público ejerzan el control los encargados de la gobernanza en su calidad de representantes de los ciudadanos. La titularidad de las entidades del sector público puede no revestir la misma importancia que en el sector privado.
  - El conocimiento de las obligaciones de información de la entidad, incluidas las referentes a la notificación de las relaciones y operaciones mantenidas con partes vinculadas.
  - Otros reglamentos que incidan en la capacidad de las entidades del sector público para mantener actividades comerciales con partes vinculadas, como los referidos a la adjudicación de contratos públicos que pueden obligar a las entidades del sector público a demostrar que las operaciones con partes vinculadas se ajustan al principio de igualdad de trato.
- P9. En el sector público, el debate sobre la exposición de los estados financieros de la entidad al riesgo de incorrecciones materiales puede abarcar también los objetivos adicionales y los riesgos conexos de incorrecciones que se exponen en el párrafo A8 de la NIA. Los auditores del sector público pueden incluir también en este debate a auditores que lleven a cabo auditorías de rendimiento, u otras, de la entidad.
- P10. En el sector público, el debate en el seno del equipo auditor sobre el fraude puede incluir la vulnerabilidad del proceso de contratación de la entidad respecto del fraude perpetrado por partes vinculadas o a través de ellas.

### Identificación y evaluación de los riesgos de incorrecciones materiales debido a relaciones y operaciones mantenidas con partes vinculadas

- P11. Además de las manifestaciones contempladas en el párrafo A 113 de la NIA 315, la dirección de una entidad del sector público puede declarar que las operaciones y actividades llevadas a cabo resultan conformes a la legislación o a otras normas. Este tipo de declaraciones pueden ampliarse a las operaciones y relaciones mantenidas con partes vinculadas y están comprendidas en el alcance de una auditoría de estados financieros.
- P12. El mandato de los auditores del sector público puede exigirles que examinen el marco legal y reglamentario que rige la entidad y cualquier otra obligación o limitación específica resultante para la entidad, los encargados de su gobernanza, la dirección o el personal, al efectuar operaciones con partes vinculadas. La entidad también puede estar sujeta a limitaciones a la hora de crear entidades entera o parcialmente de su propiedad que pudieran considerarse partes vinculadas.
- P13. Los encargados de la gobernanza de las entidades del sector público, así como la dirección y el personal pueden estar obligados también a declarar cualquier interés que tengan en las entidades con las que mantienen operaciones profesionales o comerciales. Cuando haya obligaciones legales en este sentido, los auditores del sector público deben aplicar procedimientos de evaluación de riesgos para identificar y evaluar los riesgos de incorrecciones materiales debidos al incumplimiento de dichas obligaciones.

## Respuestas a los riesgos de incorrecciones materiales debido a relaciones y operaciones mantenidas con partes vinculadas

- P14. Al concebir y aplicar los procedimientos en respuesta a los riesgos de incorrecciones materiales debidas a partes vinculadas que se describen en los párrafos 20 a 24 de la NIA, los auditores del sector público examinarán si hay exigencias adicionales de información en el sector público, como el cumplimiento de la reglamentación.
- P15. El subpárrafo 23 b) de la NIA obliga a los auditores a obtener evidencia de que las operaciones significativas con partes vinculadas situadas al margen de la actividad ordinaria de la entidad han sido debidamente autorizadas y aprobadas. En el sector público, el mandato de auditoría puede contener la obligación de informar sobre el cumplimiento de leyes y reglamentos y, dentro de ella, la obligación de obtener evidencia de que las relaciones y operaciones con partes vinculadas han sido autorizadas y aprobadas. Ello puede significar que los auditores del sector público tengan que obtener evidencia de que la dirección ha recibido dicha autorización y aprobación del poder legislativo, del ministro de finanzas o de una entidad administrativa “matriz” o patrocinadora. Este procedimiento puede ser necesario con independencia de que las operaciones sean significativas o se sitúen al margen de la actividad ordinaria de la entidad.
- P16. El párrafo 24 de la NIA obliga a los auditores a obtener evidencia suficiente y apropiada en relación con las declaraciones de la dirección sobre el hecho de que las operaciones con partes vinculadas se han llevado a cabo en condiciones equivalentes a las de una operación en que se respeta el principio de igualdad de trato. En el sector público, las leyes y reglamentos referidas a la adjudicación de contratos públicos pueden exigir que los contratos con terceros, comprendidas las partes vinculadas, están sujetos a licitación pública o cualquier otra forma de “verificación del mercado” para demostrar su eficiencia económica.

International Standard on Auditing (ISA) 550, “Related Parties” should be read in conjunction with ISA 200, “Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing.”

## Introduction

### Scope of this ISA

1. This International Standard on Auditing (ISA) deals with the auditor's responsibilities relating to related party relationships and transactions in an audit of financial statements. Specifically, it expands on how ISA 315,<sup>1</sup> ISA 330,<sup>2</sup> and ISA 240<sup>3</sup> are to be applied in relation to risks of material misstatement associated with related party relationships and transactions.

### Nature of Related Party Relationships and Transactions

2. Many related party transactions are in the normal course of business. In such circumstances, they may carry no higher risk of material misstatement of the financial statements than similar transactions with unrelated parties. However, the nature of related party relationships and transactions may, in some circumstances, give rise to higher risks of material misstatement of the financial statements than transactions with unrelated parties. For example:
  - Related parties may operate through an extensive and complex range of relationships and structures, with a corresponding increase in the complexity of related party transactions.
  - Information systems may be ineffective at identifying or summarizing transactions and outstanding balances between an entity and its related parties.
  - Related party transactions may not be conducted under normal market terms and conditions; for example, some related party transactions may be conducted with no exchange of consideration.

### Responsibilities of the Auditor

3. Because related parties are not independent of each other, many financial reporting frameworks establish specific accounting and disclosure requirements for related party relationships, transactions and balances to enable users of the financial statements to understand their nature and actual or potential effects on the financial statements. Where the applicable financial reporting framework establishes such requirements, the auditor has a responsibility to perform audit procedures to identify, assess and respond to the risks of material misstatement arising from the entity's failure to appropriately account for or disclose related party relationships, transactions or balances in accordance with the requirements of the framework.

---

<sup>1</sup> ISA 315, "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment."

<sup>2</sup> ISA 330, "The Auditor's Responses to Assessed Risks."

<sup>3</sup> ISA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements."

4. Even if the applicable financial reporting framework establishes minimal or no related party requirements, the auditor nevertheless needs to obtain an understanding of the entity's related party relationships and transactions sufficient to be able to conclude whether the financial statements, insofar as they are affected by those relationships and transactions: (Ref: Para. A1)
  - (a) Achieve fair presentation (for fair presentation frameworks); or (Ref: Para. A2)
  - (b) Are not misleading (for compliance frameworks). (Ref: Para. A3)
5. In addition, an understanding of the entity's related party relationships and transactions is relevant to the auditor's evaluation of whether one or more fraud risk factors are present as required by ISA 240,<sup>4</sup> because fraud may be more easily committed through related parties.
6. Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with the ISAs.<sup>5</sup> In the context of related parties, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for such reasons as the following:
  - Management may be unaware of the existence of all related party relationships and transactions, particularly if the applicable financial reporting framework does not establish related party requirements.
  - Related party relationships may present a greater opportunity for collusion, concealment or manipulation by management.
7. Planning and performing the audit with professional skepticism as required by ISA 200<sup>6</sup> is therefore particularly important in this context, given the potential for undisclosed related party relationships and transactions. The requirements in this ISA are designed to assist the auditor in identifying and assessing the risks of material misstatement associated with related party relationships and transactions, and in designing audit procedures to respond to the assessed risks.

### **Effective Date**

8. This ISA is effective for audits of financial statements for periods beginning on or after December 15, 2009.

---

<sup>4</sup> ISA 240, paragraph 24.

<sup>5</sup> ISA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing," paragraph A52.

<sup>6</sup> ISA 200, paragraph 15.

## Objectives

9. The objectives of the auditor are:
- (a) Irrespective of whether the applicable financial reporting framework establishes related party requirements, to obtain an understanding of related party relationships and transactions sufficient to be able:
    - (i) To recognize fraud risk factors, if any, arising from related party relationships and transactions that are relevant to the identification and assessment of the risks of material misstatement due to fraud; and
    - (ii) To conclude, based on the audit evidence obtained, whether the financial statements, insofar as they are affected by those relationships and transactions:
      - a. Achieve fair presentation (for fair presentation frameworks); or
      - b. Are not misleading (for compliance frameworks); and
  - (b) In addition, where the applicable financial reporting framework establishes related party requirements, to obtain sufficient appropriate audit evidence about whether related party relationships and transactions have been appropriately identified, accounted for and disclosed in the financial statements in accordance with the framework.

## Definitions

10. For purposes of the ISAs, the following terms have the meanings attributed below:
- (a) Arm's length transaction – A transaction conducted on such terms and conditions as between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.
  - (b) Related party – A party that is either: (Ref: Para. A4-A7)
    - (i) A related party as defined in the applicable financial reporting framework; or
    - (ii) Where the applicable financial reporting framework establishes minimal or no related party requirements:
      - a. A person or other entity that has control or significant influence, directly or indirectly through one or more intermediaries, over the reporting entity;

- b. Another entity over which the reporting entity has control or significant influence, directly or indirectly through one or more intermediaries; or
- c. Another entity that is under common control with the reporting entity through having:
  - i. Common controlling ownership;
  - ii. Owners who are close family members; or
  - iii. Common key management.

However, entities that are under common control by a state (that is, a national, regional or local government) are not considered related unless they engage in significant transactions or share resources to a significant extent with one another.

## Requirements

### Risk Assessment Procedures and Related Activities

11. As part of the risk assessment procedures and related activities that ISA 315 and ISA 240 require the auditor to perform during the audit,<sup>7</sup> the auditor shall perform the audit procedures and related activities set out in paragraphs 12-17 to obtain information relevant to identifying the risks of material misstatement associated with related party relationships and transactions. (Ref: Para. A8)

### *Understanding the Entity's Related Party Relationships and Transactions*

12. The engagement team discussion that ISA 315 and ISA 240 require<sup>8</sup> shall include specific consideration of the susceptibility of the financial statements to material misstatement due to fraud or error that could result from the entity's related party relationships and transactions. (Ref: Para. A9-A10)
13. The auditor shall inquire of management regarding:
- (a) The identity of the entity's related parties, including changes from the prior period; (Ref: Para. A11-A14)
  - (b) The nature of the relationships between the entity and these related parties; and
  - (c) Whether the entity entered into any transactions with these related parties during the period and, if so, the type and purpose of the transactions.

---

<sup>7</sup> ISA 315, paragraph 5; ISA 240, paragraph 16.

<sup>8</sup> ISA 315, paragraph 10; ISA 240, paragraph 15.

14. The auditor shall inquire of management and others within the entity, and perform other risk assessment procedures considered appropriate, to obtain an understanding of the controls, if any, that management has established to: (Ref: Para. A15-A20)
- (a) Identify, account for, and disclose related party relationships and transactions in accordance with the applicable financial reporting framework;
  - (b) Authorize and approve significant transactions and arrangements with related parties; and (Ref: Para. A21)
  - (c) Authorize and approve significant transactions and arrangements outside the normal course of business.

*Maintaining Alertness for Related Party Information When Reviewing Records or Documents*

15. During the audit, the auditor shall remain alert, when inspecting records or documents, for arrangements or other information that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. (Ref: Para. A22-A23)

In particular, the auditor shall inspect the following for indications of the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor:

- (a) Bank and legal confirmations obtained as part of the auditor's procedures;
  - (b) Minutes of meetings of shareholders and of those charged with governance; and
  - (c) Such other records or documents as the auditor considers necessary in the circumstances of the entity.
16. If the auditor identifies significant transactions outside the entity's normal course of business when performing the audit procedures required by paragraph 15 or through other audit procedures, the auditor shall inquire of management about: (Ref: Para. A24-A25)
- (a) The nature of these transactions; and (Ref: Para. A26)
  - (b) Whether related parties could be involved. (Ref: Para. A27)

*Sharing Related Party Information with the Engagement Team*

17. The auditor shall share relevant information obtained about the entity's related parties with the other members of the engagement team. (Ref: Para. A28)

### **Identification and Assessment of the Risks of Material Misstatement Associated with Related Party Relationships and Transactions**

18. In meeting the ISA 315 requirement to identify and assess the risks of material misstatement,<sup>9</sup> the auditor shall identify and assess the risks of material misstatement associated with related party relationships and transactions and determine whether any of those risks are significant risks. In making this determination, the auditor shall treat identified significant related party transactions outside the entity's normal course of business as giving rise to significant risks.
19. If the auditor identifies fraud risk factors (including circumstances relating to the existence of a related party with dominant influence) when performing the risk assessment procedures and related activities in connection with related parties, the auditor shall consider such information when identifying and assessing the risks of material misstatement due to fraud in accordance with ISA 240. (Ref: Para. A6 and A29-A30)

### **Responses to the Risks of Material Misstatement Associated with Related Party Relationships and Transactions**

20. As part of the ISA 330 requirement that the auditor respond to assessed risks,<sup>10</sup> the auditor designs and performs further audit procedures to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement associated with related party relationships and transactions. These audit procedures shall include those required by paragraphs 21-24. (Ref: Para. A31-A34)

#### *Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions*

21. If the auditor identifies arrangements or information that suggests the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor, the auditor shall determine whether the underlying circumstances confirm the existence of those relationships or transactions.
22. If the auditor identifies related parties or significant related party transactions that management has not previously identified or disclosed to the auditor, the auditor shall:
  - (a) Promptly communicate the relevant information to the other members of the engagement team; (Ref: Para. A35)
  - (b) Where the applicable financial reporting framework establishes related party requirements:

---

<sup>9</sup> ISA 315, paragraph 25.

<sup>10</sup> ISA 330, paragraphs 5-6.

- (i) Request management to identify all transactions with the newly identified related parties for the auditor's further evaluation; and
  - (ii) Inquire as to why the entity's controls over related party relationships and transactions failed to enable the identification or disclosure of the related party relationships or transactions;
- (c) Perform appropriate substantive audit procedures relating to such newly identified related parties or significant related party transactions; (Ref: Para. A36)
- (d) Reconsider the risk that other related parties or significant related party transactions may exist that management has not previously identified or disclosed to the auditor, and perform additional audit procedures as necessary; and
- (e) If the non-disclosure by management appears intentional (and therefore indicative of a risk of material misstatement due to fraud), evaluate the implications for the audit. (Ref: Para. A37)

*Identified Significant Related Party Transactions outside the Entity's Normal Course of Business*

23. For identified significant related party transactions outside the entity's normal course of business, the auditor shall:
- (a) Inspect the underlying contracts or agreements, if any, and evaluate whether:
    - (i) The business rationale (or lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets;<sup>11</sup> (Ref: Para. A38-A39)
    - (ii) The terms of the transactions are consistent with management's explanations; and
    - (iii) The transactions have been appropriately accounted for and disclosed in accordance with the applicable financial reporting framework; and
  - (b) Obtain audit evidence that the transactions have been appropriately authorized and approved. (Ref: Para. A40-A41)

---

<sup>11</sup> ISA 240, paragraph 32(c).

*Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction*

24. If management has made an assertion in the financial statements to the effect that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, the auditor shall obtain sufficient appropriate audit evidence about the assertion. (Ref: Para. A42-A45)

**Evaluation of the Accounting for and Disclosure of Identified Related Party Relationships and Transactions**

25. In forming an opinion on the financial statements in accordance with ISA 700,<sup>12</sup> the auditor shall evaluate: (Ref: Para. A46)
- (a) Whether the identified related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the applicable financial reporting framework; and (Ref: Para. A47)
  - (b) Whether the effects of the related party relationships and transactions:
    - (i) Prevent the financial statements from achieving fair presentation (for fair presentation frameworks); or
    - (ii) Cause the financial statements to be misleading (for compliance frameworks).

**Written Representations**

26. Where the applicable financial reporting framework establishes related party requirements, the auditor shall obtain written representations from management and, where appropriate, those charged with governance that: (Ref: Para. A48-A49)
- (a) They have disclosed to the auditor the identity of the entity's related parties and all the related party relationships and transactions of which they are aware; and
  - (b) They have appropriately accounted for and disclosed such relationships and transactions in accordance with the requirements of the framework.

**Communication with Those Charged with Governance**

27. Unless all of those charged with governance are involved in managing the entity,<sup>13</sup> the auditor shall communicate with those charged with governance significant matters arising during the audit in connection with the entity's related parties. (Ref: Para. A50)

---

<sup>12</sup> ISA 700, "Forming an Opinion and Reporting on Financial Statements," paragraphs 10-15.

<sup>13</sup> ISA 260, "Communication with Those Charged with Governance," paragraph 13.

## Documentation

28. The auditor shall include in the audit documentation the names of the identified related parties and the nature of the related party relationships.<sup>14</sup>

\*\*\*

## Application and Other Explanatory Material

### Responsibilities of the Auditor

#### *Financial Reporting Frameworks That Establish Minimal Related Party Requirements* (Ref: Para. 4)

- A1. An applicable financial reporting framework that establishes minimal related party requirements is one that defines the meaning of a related party but that definition has a substantially narrower scope than the definition set out in paragraph 10(b)(ii) of this ISA, so that a requirement in the framework to disclose related party relationships and transactions would apply to substantially fewer related party relationships and transactions.

#### *Fair Presentation Frameworks* (Ref: Para. 4(a))

- A2. In the context of a fair presentation framework,<sup>15</sup> related party relationships and transactions may cause the financial statements to fail to achieve fair presentation if, for example, the economic reality of such relationships and transactions is not appropriately reflected in the financial statements. For instance, fair presentation may not be achieved if the sale of a property by the entity to a controlling shareholder at a price above or below fair market value has been accounted for as a transaction involving a profit or loss for the entity when it may constitute a contribution or return of capital or the payment of a dividend.

#### *Compliance Frameworks* (Ref: Para. 4(b))

- A3. In the context of a compliance framework, whether related party relationships and transactions cause the financial statements to be misleading as discussed in ISA 700 depends upon the particular circumstances of the engagement. For example, even if non-disclosure of related party transactions in the financial statements is in compliance with the framework and applicable law or regulation, the financial statements could be misleading if the entity derives a very substantial portion of its revenue from transactions with related parties, and that fact is not disclosed. However, it will be extremely rare for the auditor

---

<sup>14</sup> ISA 230, “Audit Documentation,” paragraphs 8-11, and paragraph A6.

<sup>15</sup> ISA 200, paragraph 13(a), defines the meaning of fair presentation and compliance frameworks.

to consider financial statements that are prepared and presented in accordance with a compliance framework to be misleading if in accordance with ISA 210<sup>16</sup> the auditor determined that the framework is acceptable.<sup>17</sup>

**Definition of a Related Party** (Ref: Para. 10(b))

- A4. Many financial reporting frameworks discuss the concepts of control and significant influence. Although they may discuss these concepts using different terms, they generally explain that:
- (a) Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities; and
  - (b) Significant influence (which may be gained by share ownership, statute or agreement) is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.
- A5. The existence of the following relationships may indicate the presence of control or significant influence:
- (a) Direct or indirect equity holdings or other financial interests in the entity.
  - (b) The entity's holdings of direct or indirect equity or other financial interests in other entities.
  - (c) Being part of those charged with governance or key management (that is, those members of management who have the authority and responsibility for planning, directing and controlling the activities of the entity).
  - (d) Being a close family member of any person referred to in subparagraph (c).
  - (e) Having a significant business relationship with any person referred to in subparagraph (c).

*Related Parties with Dominant Influence*

- A6. Related parties, by virtue of their ability to exert control or significant influence, may be in a position to exert dominant influence over the entity or its management. Consideration of such behavior is relevant when identifying and assessing the risks of material misstatement due to fraud, as further explained in paragraphs A29-A30.

---

<sup>16</sup> ISA 210, "Agreeing the Terms of Audit Engagements," paragraph 6(a).

<sup>17</sup> ISA 700, paragraph A12.

### *Special-Purpose Entities as Related Parties*

- A7. In some circumstances, a special-purpose entity<sup>18</sup> may be a related party of the entity because the entity may in substance control it, even if the entity owns little or none of the special-purpose entity's equity.

### **Risk Assessment Procedures and Related Activities**

#### *Risks of Material Misstatement Associated with Related Party Relationships and Transactions (Ref: Para. 11)*

##### Considerations Specific to Public Sector Entities

- A8. The public sector auditor's responsibilities regarding related party relationships and transactions may be affected by the audit mandate, or by obligations on public sector entities arising from law, regulation or other authority. Consequently, the public sector auditor's responsibilities may not be limited to addressing the risks of material misstatement associated with related party relationships and transactions, but may also include a broader responsibility to address the risks of non-compliance with law, regulation and other authority governing public sector bodies that lay down specific requirements in the conduct of business with related parties. Further, the public sector auditor may need to have regard to public sector financial reporting requirements for related party relationships and transactions that may differ from those in the private sector.

#### *Understanding the Entity's Related Party Relationships and Transactions*

##### Discussion among the Engagement Team (Ref: Para. 12)

- A9. Matters that may be addressed in the discussion among the engagement team include:
- The nature and extent of the entity's relationships and transactions with related parties (using, for example, the auditor's record of identified related parties updated after each audit).
  - An emphasis on the importance of maintaining professional skepticism throughout the audit regarding the potential for material misstatement associated with related party relationships and transactions.
  - The circumstances or conditions of the entity that may indicate the existence of related party relationships or transactions that management has not identified or disclosed to the auditor (for example, a complex organizational structure, use of special-purpose entities for off-balance sheet transactions, or an inadequate information system).

---

<sup>18</sup> ISA 315, paragraphs A26-A27, provides guidance regarding the nature of a special-purpose entity.

- The records or documents that may indicate the existence of related party relationships or transactions.
  - The importance that management and those charged with governance attach to the identification, appropriate accounting for, and disclosure of related party relationships and transactions (if the applicable financial reporting framework establishes related party requirements), and the related risk of management override of relevant controls.
- A10. In addition, the discussion in the context of fraud may include specific consideration of how related parties may be involved in fraud. For example:
- How special-purpose entities controlled by management might be used to facilitate earnings management.
  - How transactions between the entity and a known business partner of a key member of management could be arranged to facilitate misappropriation of the entity's assets.

#### The Identity of the Entity's Related Parties (Ref: Para. 13(a))

- A11. Where the applicable financial reporting framework establishes related party requirements, information regarding the identity of the entity's related parties is likely to be readily available to management because the entity's information systems will need to record, process and summarize related party relationships and transactions to enable the entity to meet the accounting and disclosure requirements of the framework. Management is therefore likely to have a comprehensive list of related parties and changes from the prior period. For recurring engagements, making the inquiries provides a basis for comparing the information supplied by management with the auditor's record of related parties noted in previous audits.
- A12. However, where the framework does not establish related party requirements, the entity may not have such information systems in place. Under such circumstances, it is possible that management may not be aware of the existence of all related parties. Nevertheless, the requirement to make the inquiries specified by paragraph 13 still applies because management may be aware of parties that meet the related party definition set out in this ISA. In such a case, however, the auditor's inquiries regarding the identity of the entity's related parties are likely to form part of the auditor's risk assessment procedures and related activities performed in accordance with ISA 315 to obtain information regarding:
- The entity's ownership and governance structures;
  - The types of investments that the entity is making and plans to make; and
  - The way the entity is structured and how it is financed.

In the particular case of common control relationships, as management is more likely to be aware of such relationships if they have economic significance to the entity, the auditor's inquiries are likely to be more effective if they are focused on whether parties with which the entity engages in significant transactions, or shares resources to a significant degree, are related parties.

- A13. In the context of a group audit, ISA 600 requires the group engagement team to provide each component auditor with a list of related parties prepared by group management and any other related parties of which the group engagement team is aware.<sup>19</sup> Where the entity is a component within a group, this information provides a useful basis for the auditor's inquiries of management regarding the identity of the entity's related parties.
- A14. The auditor may also obtain some information regarding the identity of the entity's related parties through inquiries of management during the engagement acceptance or continuance process.

#### The Entity's Controls over Related Party Relationships and Transactions (Ref: Para. 14)

- A15. Others within the entity are those considered likely to have knowledge of the entity's related party relationships and transactions, and the entity's controls over such relationships and transactions. These may include, to the extent that they do not form part of management:
- Those charged with governance;
  - Personnel in a position to initiate, process, or record transactions that are both significant and outside the entity's normal course of business, and those who supervise or monitor such personnel;
  - Internal auditors;
  - In-house legal counsel; and
  - The chief ethics officer or equivalent person.
- A16. The audit is conducted on the premise that management and, where appropriate, those charged with governance have acknowledged and understand that they have responsibility for the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant their fair presentation, and for such internal control as management and, where appropriate, those charged with governance determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.<sup>20</sup> Accordingly, where the

---

<sup>19</sup> ISA 600, "Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)," paragraph 40(e).

<sup>20</sup> ISA 200, paragraph A2.

framework establishes related party requirements, the preparation of the financial statements requires management, with oversight from those charged with governance, to design, implement and maintain adequate controls over related party relationships and transactions so that these are identified and appropriately accounted for and disclosed in accordance with the framework. In their oversight role, those charged with governance monitor how management is discharging its responsibility for such controls. Regardless of any related party requirements the framework may establish, those charged with governance may, in their oversight role, obtain information from management to enable them to understand the nature and business rationale of the entity's related party relationships and transactions.

A17. In meeting the ISA 315 requirement to obtain an understanding of the control environment,<sup>21</sup> the auditor may consider features of the control environment relevant to mitigating the risks of material misstatement associated with related party relationships and transactions, such as:

- Internal ethical codes, appropriately communicated to the entity's personnel and enforced, governing the circumstances in which the entity may enter into specific types of related party transactions.
- Policies and procedures for open and timely disclosure of the interests that management and those charged with governance have in related party transactions.
- The assignment of responsibilities within the entity for identifying, recording, summarizing, and disclosing related party transactions.
- Timely disclosure and discussion between management and those charged with governance of significant related party transactions outside the entity's normal course of business, including whether those charged with governance have appropriately challenged the business rationale of such transactions (for example, by seeking advice from external professional advisors).
- Clear guidelines for the approval of related party transactions involving actual or perceived conflicts of interest, such as approval by a subcommittee of those charged with governance comprising individuals independent of management.
- Periodic reviews by internal auditors, where applicable.
- Proactive action taken by management to resolve related party disclosure issues, such as by seeking advice from the auditor or external legal counsel.

---

<sup>21</sup> ISA 315, paragraph 14.

- The existence of whistle-blowing policies and procedures, where applicable.

A18. Controls over related party relationships and transactions within some entities may be deficient or non-existent for a number of reasons, such as:

- The low importance attached by management to identifying and disclosing related party relationships and transactions.
- The lack of appropriate oversight by those charged with governance.
- An intentional disregard for such controls because related party disclosures may reveal information that management considers sensitive, for example, the existence of transactions involving family members of management.
- An insufficient understanding by management of the related party requirements of the applicable financial reporting framework.
- The absence of disclosure requirements under the applicable financial reporting framework.

Where such controls are ineffective or non-existent, the auditor may be unable to obtain sufficient appropriate audit evidence about related party relationships and transactions. If this were the case, the auditor would, in accordance with ISA 705,<sup>22</sup> consider the implications for the audit, including the opinion in the auditor's report.

A19. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.<sup>23</sup> The risk of management override of controls is higher if management has relationships that involve control or significant influence with parties with which the entity does business because these relationships may present management with greater incentives and opportunities to perpetrate fraud. For example, management's financial interests in certain related parties may provide incentives for management to override controls by (a) directing the entity, against its interests, to conclude transactions for the benefit of these parties, or (b) colluding with such parties or controlling their actions. Examples of possible fraud include:

- Creating fictitious terms of transactions with related parties designed to misrepresent the business rationale of these transactions.
- Fraudulently organizing the transfer of assets from or to management or others at amounts significantly above or below market value.
- Engaging in complex transactions with related parties, such as special-

---

<sup>22</sup> ISA 705, "Modifications to the Opinion in the Independent Auditor's Report."

<sup>23</sup> ISA 240, paragraphs 31 and A4.

purpose entities, that are structured to misrepresent the financial position or financial performance of the entity.

#### Considerations specific to smaller entities

A20. Control activities in smaller entities are likely to be less formal and smaller entities may have no documented processes for dealing with related party relationships and transactions. An owner-manager may mitigate some of the risks arising from related party transactions, or potentially increase those risks, through active involvement in all the main aspects of the transactions. For such entities, the auditor may obtain an understanding of the related party relationships and transactions, and any controls that may exist over these, through inquiry of management combined with other procedures, such as observation of management's oversight and review activities, and inspection of available relevant documentation.

#### Authorization and approval of significant transactions and arrangements (Ref: Para. 14(b))

A21. Authorization involves the granting of permission by a party or parties with the appropriate authority (whether management, those charged with governance or the entity's shareholders) for the entity to enter into specific transactions in accordance with pre-determined criteria, whether judgmental or not. Approval involves those parties' acceptance of the transactions the entity has entered into as having satisfied the criteria on which authorization was granted. Examples of controls the entity may have established to authorize and approve significant transactions and arrangements with related parties or significant transactions and arrangements outside the normal course of business include:

- Monitoring controls to identify such transactions and arrangements for authorization and approval.
- Approval of the terms and conditions of the transactions and arrangements by management, those charged with governance or, where applicable, shareholders.

#### *Maintaining Alertness for Related Party Information When Reviewing Records or Documents*

#### Records or Documents That the Auditor May Inspect (Ref: Para. 15)

A22. During the audit, the auditor may inspect records or documents that may provide information about related party relationships and transactions, for example:

- Third-party confirmations obtained by the auditor (in addition to bank and legal confirmations).
- Entity income tax returns.

- Information supplied by the entity to regulatory authorities.
- Shareholder registers to identify the entity's principal shareholders.
- Statements of conflicts of interest from management and those charged with governance.
- Records of the entity's investments and those of its pension plans.
- Contracts and agreements with key management or those charged with governance.
- Significant contracts and agreements not in the entity's ordinary course of business.
- Specific invoices and correspondence from the entity's professional advisors.
- Life insurance policies acquired by the entity.
- Significant contracts re-negotiated by the entity during the period.
- Internal auditors' reports.
- Documents associated with the entity's filings with a securities regulator (for example, prospectuses).

Arrangements that may indicate the existence of previously unidentified or undisclosed related party relationships or transactions.

A23. An arrangement involves a formal or informal agreement between the entity and one or more other parties for such purposes as:

- The establishment of a business relationship through appropriate vehicles or structures.
- The conduct of certain types of transactions under specific terms and conditions.
- The provision of designated services or financial support.

Examples of arrangements that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor include:

- Participation in unincorporated partnerships with other parties.
- Agreements for the provision of services to certain parties under terms and conditions that are outside the entity's normal course of business.
- Guarantees and guarantor relationships.

### Identification of Significant Transactions outside the Normal Course of Business (Ref: Para. 16)

- A24. Obtaining further information on significant transactions outside the entity's normal course of business enables the auditor to evaluate whether fraud risk factors, if any, are present and, where the applicable financial reporting framework establishes related party requirements, to identify the risks of material misstatement.
- A25. Examples of transactions outside the entity's normal course of business may include:
- Complex equity transactions, such as corporate restructurings or acquisitions.
  - Transactions with offshore entities in jurisdictions with weak corporate laws.
  - The leasing of premises or the rendering of management services by the entity to another party if no consideration is exchanged.
  - Sales transactions with unusually large discounts or returns.
  - Transactions with circular arrangements, for example, sales with a commitment to repurchase.
  - Transactions under contracts whose terms are changed before expiry.

### Understanding the nature of significant transactions outside the normal course of business (Ref: Para. 16(a))

- A26. Inquiring into the nature of the significant transactions outside the entity's normal course of business involves obtaining an understanding of the business rationale of the transactions, and the terms and conditions under which these have been entered into.

### Inquiring into whether related parties could be involved (Ref: Para. 16(b))

- A27. A related party could be involved in a significant transaction outside the entity's normal course of business not only by directly influencing the transaction through being a party to the transaction, but also by indirectly influencing it through an intermediary. Such influence may indicate the presence of a fraud risk factor.

### *Sharing Related Party Information with the Engagement Team* (Ref: Para. 17)

- A28. Relevant related party information that may be shared among the engagement team members includes, for example:
- The identity of the entity's related parties.
  - The nature of the related party relationships and transactions.

- Significant or complex related party relationships or transactions that may require special audit consideration, in particular transactions in which management or those charged with governance are financially involved.

### **Identification and Assessment of the Risks of Material Misstatement Associated with Related Party Relationships and Transactions**

*Fraud Risk Factors Associated with a Related Party with Dominant Influence* (Ref: Para. 19)

A29. Domination of management by a single person or small group of persons without compensating controls is a fraud risk factor.<sup>24</sup> Indicators of dominant influence exerted by a related party include:

- The related party has vetoed significant business decisions taken by management or those charged with governance.
- Significant transactions are referred to the related party for final approval.
- There is little or no debate among management and those charged with governance regarding business proposals initiated by the related party.
- Transactions involving the related party (or a close family member of the related party) are rarely independently reviewed and approved.

Dominant influence may also exist in some cases if the related party has played a leading role in founding the entity and continues to play a leading role in managing the entity.

A30. In the presence of other risk factors, the existence of a related party with dominant influence may indicate significant risks of material misstatement due to fraud. For example:

- An unusually high turnover of senior management or professional advisors may suggest unethical or fraudulent business practices that serve the related party's purposes.
- The use of business intermediaries for significant transactions for which there appears to be no clear business justification may suggest that the related party could have an interest in such transactions through control of such intermediaries for fraudulent purposes.
- Evidence of the related party's excessive participation in or preoccupation with the selection of accounting policies or the determination of significant estimates may suggest the possibility of fraudulent financial reporting.

---

<sup>24</sup> ISA 240, Appendix 1.

### **Responses to the Risks of Material Misstatement Associated with Related Party Relationships and Transactions (Ref: Para. 20)**

- A31. The nature, timing and extent of the further audit procedures that the auditor may select to respond to the assessed risks of material misstatement associated with related party relationships and transactions depend upon the nature of those risks and the circumstances of the entity.<sup>25</sup>
- A32. Examples of substantive audit procedures that the auditor may perform when the auditor has assessed a significant risk that management has not appropriately accounted for or disclosed specific related party transactions in accordance with the applicable financial reporting framework (whether due to fraud or error) include:
- Confirming or discussing specific aspects of the transactions with intermediaries such as banks, law firms, guarantors, or agents, where practicable and not prohibited by law, regulation or ethical rules.
  - Confirming the purposes, specific terms or amounts of the transactions with the related parties (this audit procedure may be less effective where the auditor judges that the entity is likely to influence the related parties in their responses to the auditor).
  - Where applicable, reading the financial statements or other relevant financial information, if available, of the related parties for evidence of the accounting of the transactions in the related parties' accounting records.
- A33. If the auditor has assessed a significant risk of material misstatement due to fraud as a result of the presence of a related party with dominant influence, the auditor may, in addition to the general requirements of ISA 240, perform audit procedures such as the following to obtain an understanding of the business relationships that such a related party may have established directly or indirectly with the entity and to determine the need for further appropriate substantive audit procedures:
- Inquiries of, and discussion with, management and those charged with governance.
  - Inquiries of the related party.
  - Inspection of significant contracts with the related party.
  - Appropriate background research, such as through the Internet or specific external business information databases.

---

<sup>25</sup> ISA 330 provides further guidance on considering the nature, timing and extent of further audit procedures. ISA 240 establishes requirements and provides guidance on appropriate responses to assessed risks of material misstatement due to fraud.

- Review of employee whistle-blowing reports where these are retained.
- A34. Depending upon the results of the auditor's risk assessment procedures, the auditor may consider it appropriate to obtain audit evidence without testing the entity's controls over related party relationships and transactions. In some circumstances, however, it may not be possible to obtain sufficient appropriate audit evidence from substantive audit procedures alone in relation to the risks of material misstatement associated with related party relationships and transactions. For example, where intra-group transactions between the entity and its components are numerous and a significant amount of information regarding these transactions is initiated, recorded, processed or reported electronically in an integrated system, the auditor may determine that it is not possible to design effective substantive audit procedures that by themselves would reduce the risks of material misstatement associated with these transactions to an acceptably low level. In such a case, in meeting the ISA 330 requirement to obtain sufficient appropriate audit evidence as to the operating effectiveness of relevant controls,<sup>26</sup> the auditor is required to test the entity's controls over the completeness and accuracy of the recording of the related party relationships and transactions.

*Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions*

**Communicating Newly Identified Related Party Information to the Engagement Team (Ref: Para. 22(a))**

- A35. Communicating promptly any newly identified related parties to the other members of the engagement team assists them in determining whether this information affects the results of, and conclusions drawn from, risk assessment procedures already performed, including whether the risks of material misstatement need to be reassessed.

**Substantive Procedures Relating to Newly Identified Related Parties or Significant Related Party Transactions (Ref: Para. 22(c))**

- A36. Examples of substantive audit procedures that the auditor may perform relating to newly identified related parties or significant related party transactions include:
- Making inquiries regarding the nature of the entity's relationships with the newly identified related parties, including (where appropriate and not prohibited by law, regulation or ethical rules) inquiring of parties outside the entity who are presumed to have significant knowledge of the entity and its business, such as legal counsel, principal agents, major representatives, consultants, guarantors, or other close business partners.

---

<sup>26</sup> ISA 330, paragraph 8(b).

- Conducting an analysis of accounting records for transactions with the newly identified related parties. Such an analysis may be facilitated using computer-assisted audit techniques.
- Verifying the terms and conditions of the newly identified related party transactions, and evaluating whether the transactions have been appropriately accounted for and disclosed in accordance with the applicable financial reporting framework.

#### Intentional Non-Disclosure by Management (Ref: Para. 22(e))

A37. The requirements and guidance in ISA 240 regarding the auditor's responsibilities relating to fraud in an audit of financial statements are relevant where management appears to have intentionally failed to disclose related parties or significant related party transactions to the auditor. The auditor may also consider whether it is necessary to re-evaluate the reliability of management's responses to the auditor's inquiries and management's representations to the auditor.

#### *Identified Significant Related Party Transactions outside the Entity's Normal Course of Business*

#### Evaluating the Business Rationale of Significant Related Party Transactions (Ref: Para. 23)

A38. In evaluating the business rationale of a significant related party transaction outside the entity's normal course of business, the auditor may consider the following:

- Whether the transaction:
  - Is overly complex (for example, it may involve multiple related parties within a consolidated group).
  - Has unusual terms of trade, such as unusual prices, interest rates, guarantees and repayment terms.
  - Lacks an apparent logical business reason for its occurrence.
  - Involves previously unidentified related parties.
  - Is processed in an unusual manner.
- Whether management has discussed the nature of, and accounting for, such a transaction with those charged with governance.
- Whether management is placing more emphasis on a particular accounting treatment rather than giving due regard to the underlying economics of the transaction.

If management's explanations are materially inconsistent with the terms of the related party transaction, the auditor is required, in accordance with ISA 500,<sup>27</sup> to consider the reliability of management's explanations and representations on other significant matters.

- A39. The auditor may also seek to understand the business rationale of such a transaction from the related party's perspective, as this may help the auditor to better understand the economic reality of the transaction and why it was carried out. A business rationale from the related party's perspective that appears inconsistent with the nature of its business may represent a fraud risk factor.

#### Authorization and Approval of Significant Related Party Transactions (Ref: Para. 23(b))

- A40. Authorization and approval by management, those charged with governance, or, where applicable, the shareholders of significant related party transactions outside the entity's normal course of business may provide audit evidence that these have been duly considered at the appropriate levels within the entity and that their terms and conditions have been appropriately reflected in the financial statements. The existence of transactions of this nature that were not subject to such authorization and approval, in the absence of rational explanations based on discussion with management or those charged with governance, may indicate risks of material misstatement due to error or fraud. In these circumstances, the auditor may need to be alert for other transactions of a similar nature. Authorization and approval alone, however, may not be sufficient in concluding whether risks of material misstatement due to fraud are absent because authorization and approval may be ineffective if there has been collusion between the related parties or if the entity is subject to the dominant influence of a related party.

#### Considerations specific to smaller entities

- A41. A smaller entity may not have the same controls provided by different levels of authority and approval that may exist in a larger entity. Accordingly, when auditing a smaller entity, the auditor may rely to a lesser degree on authorization and approval for audit evidence regarding the validity of significant related party transactions outside the entity's normal course of business. Instead, the auditor may consider performing other audit procedures such as inspecting relevant documents, confirming specific aspects of the transactions with relevant parties, or observing the owner-manager's involvement with the transactions.

---

<sup>27</sup> ISA 500, "Audit Evidence," paragraph 11.

*Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction (Ref: Para. 24)*

- A42. Although audit evidence may be readily available regarding how the price of a related party transaction compares to that of a similar arm's length transaction, there are ordinarily practical difficulties that limit the auditor's ability to obtain audit evidence that all other aspects of the transaction are equivalent to those of the arm's length transaction. For example, although the auditor may be able to confirm that a related party transaction has been conducted at a market price, it may be impracticable to confirm whether other terms and conditions of the transaction (such as credit terms, contingencies and specific charges) are equivalent to those that would ordinarily be agreed between independent parties. Accordingly, there may be a risk that management's assertion that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction may be materially misstated.
- A43. The preparation of the financial statements requires management to substantiate an assertion that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction. Management's support for the assertion may include:
- Comparing the terms of the related party transaction to those of an identical or similar transaction with one or more unrelated parties.
  - Engaging an external expert to determine a market value and to confirm market terms and conditions for the transaction.
  - Comparing the terms of the transaction to known market terms for broadly similar transactions on an open market.
- A44. Evaluating management's support for this assertion may involve one or more of the following:
- Considering the appropriateness of management's process for supporting the assertion.
  - Verifying the source of the internal or external data supporting the assertion, and testing the data to determine their accuracy, completeness and relevance.
  - Evaluating the reasonableness of any significant assumptions on which the assertion is based.
- A45. Some financial reporting frameworks require the disclosure of related party transactions not conducted on terms equivalent to those prevailing in arm's length transactions. In these circumstances, if management has not disclosed a related party transaction in the financial statements, there may be an implicit assertion that the transaction was conducted on terms equivalent to those prevailing in an arm's length transaction.

## **Evaluation of the Accounting for and Disclosure of Identified Related Party Relationships and Transactions**

### *Materiality Considerations in Evaluating Misstatements* (Ref: Para. 25)

A46. ISA 450 requires the auditor to consider both the size and the nature of a misstatement, and the particular circumstances of its occurrence, when evaluating whether the misstatement is material.<sup>28</sup> The significance of the transaction to the financial statement users may not depend solely on the recorded amount of the transaction but also on other specific relevant factors, such as the nature of the related party relationship.

### *Evaluation of Related Party Disclosures* (Ref: Para. 25(a))

A47. Evaluating the related party disclosures in the context of the disclosure requirements of the applicable financial reporting framework means considering whether the facts and circumstances of the entity's related party relationships and transactions have been appropriately summarized and presented so that the disclosures are understandable. Disclosures of related party transactions may not be understandable if:

- (a) The business rationale and the effects of the transactions on the financial statements are unclear or misstated; or
- (b) Key terms, conditions, or other important elements of the transactions necessary for understanding them are not appropriately disclosed.

### **Written Representations** (Ref: Para. 26)

A48. Circumstances in which it may be appropriate to obtain written representations from those charged with governance include:

- When they have approved specific related party transactions that (a) materially affect the financial statements, or (b) involve management.
- When they have made specific oral representations to the auditor on details of certain related party transactions.
- When they have financial or other interests in the related parties or the related party transactions.

A49. The auditor may also decide to obtain written representations regarding specific assertions that management may have made, such as a representation that specific related party transactions do not involve undisclosed side agreements.

---

<sup>28</sup> ISA 450, "Evaluation of Misstatements Identified during the Audit," paragraph 11(a). Paragraph A16 of ISA 450 provides guidance on the circumstances that may affect the evaluation of a misstatement.

### **Communication with Those Charged with Governance (Ref: Para. 27)**

A50. Communicating significant matters arising during the audit<sup>29</sup> in connection with the entity's related parties helps the auditor to establish a common understanding with those charged with governance of the nature and resolution of these matters. Examples of significant related party matters include:

- Non-disclosure (whether intentional or not) by management to the auditor of related parties or significant related party transactions, which may alert those charged with governance to significant related party relationships and transactions of which they may not have been previously aware.
- The identification of significant related party transactions that have not been appropriately authorized and approved, which may give rise to suspected fraud.
- Disagreement with management regarding the accounting for and disclosure of significant related party transactions in accordance with the applicable financial reporting framework.
- Non-compliance with applicable law or regulations prohibiting or restricting specific types of related party transactions.
- Difficulties in identifying the party that ultimately controls the entity.

---

<sup>29</sup> ISA 230, paragraph A8, provides further guidance on the nature of significant matters arising during the audit.
